

Return Line Filter

System Components

General

Specifically designed for filtering oil in the return line of continuous lubricating systems.

Features

- + Cap easily removed for cleaning/replacement without disconnecting inlet/outlet lines.
- + Large filter area minimizes cleaning frequency.
- + Can be placed in any convenient location (in return line) to provide easy accessibility or can be tank mounted (gasket included).

Technical Data

Filter Element	100 micron
Type	In-Line or Tank Mounted
Nominal Flow	25 Liter/Min
Connections	G1/2"
Vent Filtration	2 Micron
Vent Type	Steel Wool Breather

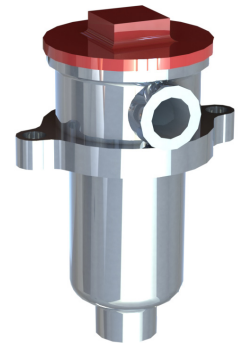

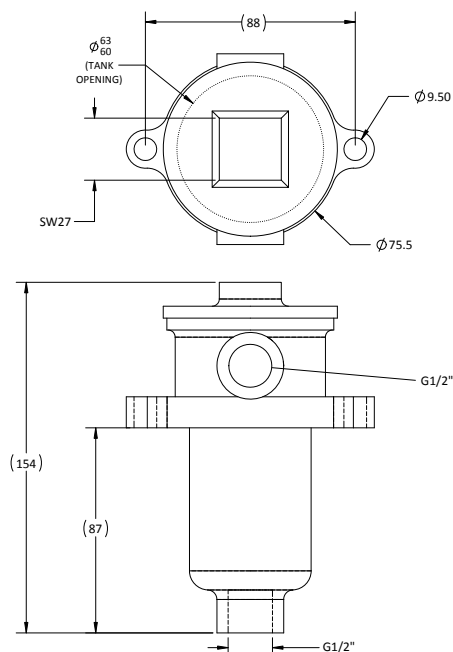

Note: Designed for gravity return.

How to Order

Name	Part #	Replacement Element
Return Line Filter	70808	AK161E

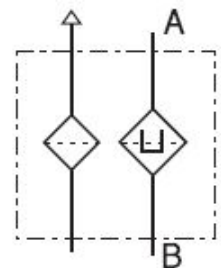

When ordering, specify by name and part number, e.g. Return Line Filter, Part #70808.

Dimensional Schematics

ATTENTION

Filter must be installed in a vertical position as shown.
